Dear Parents and Carers

Re: Question Level Analysis (QLA)

We hope this message finds you well.

As part of our commitment to supporting every student's progress in mathematics, we have completed a Baseline Question Pack with our Year 7 classes. Following this, each student has been provided with a **Question Level Analysis (QLA)**, which breaks down their performance across the key topics covered in KS2.

You will find your child's QLA stuck into the front of their maths exercise book. This resource is designed to help students identify areas of strength and highlight any topics where further review may be beneficial. We encourage you to take a moment to look through the QLA with your child and discuss any areas they might want to revisit using the Sparx Maths codes.

While this is not a compulsory task, we believe that engaging with the QLA can be a valuable step in helping students take ownership of their learning and make targeted improvements. Our teaching staff will also be using this information to tailor support and ensure every student is well-equipped to succeed.

Thank you for your continued support in your child's learning journey. If you have any questions or would like further guidance on how to use the QLA effectively, please don't hesitate to get in touch.

Yours sincerely
Ms. R Andrews
Maths Teacher
